7. (a) The great scientific discoveries of our time have made a tremendous impact on the industry by putting it on road to prosperity. Advancements in the engineering industry like aircrafts, building construction, steel making, machine tools, electronic components, computers and numerous other branches have been quite remarkable

and significant. Everyday, we read, about some development making the previous day's design out of date. Science had advanced to the extent of landing on the moon with split second accuracy. No nation in these days of rapid scientific development and inventions can afford to lag behind.

India has made great progress in the field of industry in the last two decades. This has been possible because of the contribution of the scientist and the engineering team, engaged in a dedicated way for the development of the country. While the scientists are engaged in inventions, it is the job of practically trained persons to translate their new ideas into practical profitable possibilities for the masses.

Read the above passage and answer the questions given below : 2 each

- (i) What is the impact of the great scientific discoveries ?
- (ii) What are the main branches in the engineering industry ?
- (iii) To what extent science has advanced ?
- (iv) Why is India going on road to prosperity during the last few decades ?
