EX-6002 (CBGS)

B.E. VI Semester

Examination, May 2019

Choice Based Grading System (CBGS) Power System-II

Time: Three Hours

Maximum Marks: 70

Note: i) Attempt any five questions.

- ii) All questions carry equal marks.
- 1. a) What is deregulations in power system? Explain its effect and how it can be over come.
 - b) Why the inter connected power system is necessary?
 Explain the problems associated with them.
- 2. a) Explain Gauss Seidel method for local flow studies. 7
 - b) Form Y_{bus} for the 4-bus system if the line series impedances are as follows

Line (bus to bus)	Impedance (p.u.)
1-2	0.25+j1.0
1-3	0.20+j0.8
1-4	0.30+j1.2
2-3	0.20+j0.8
3-4	0.15+j0.6

http://www.rgpvonline.com

http://www.rgpvonline.com

3. a) Compare different types of load flow studies.b) What are the advantages of Y_{bus} over Z_{bus}?

4. a) Explain the load frequency by its block diagram.

 Explain the ill effects of frequency variation in power system.

5. a) Describe how series and shunt capacitors can minimise the voltage drop in the line?

 Explain why voltage variation is occur in power system and why is voltage control required in power system. 7 http://www.rgpvonline.com

6. a) Derive the swing equation of a synchronous machine. 7

b) What is equal criteria? Explain.

a) Explain with the help of block diagram automatic voltage regulator of turbo generators.

b) What is the need of the excitation system? Explain A.C. static excitation system.

3. Write short notes (any two)

 $2 \times 7 = 14$

- a) Economic dispatch
- b) Pricing of energy
- c) Excitation systems
- Variations of voltages in power system.
