## Column A

- i) RBCs.
- ii) Rancidity
- iii) Wilson's Diseas
- iv) WBCs
- v) Alkaptonuria
- vi) Platelets
- vii) Cholesterol
- viii) Atherosclerosis
- ix) Jaundice
- x) Hematūria

## Column B

- a) Denaturation of oils
- b) 4000-11000 cells/mm<sup>3</sup>
- 1,50,000-30,000 cells/mm<sup>3</sup>,
- d) 4.5 5.5 millions/mm<sup>3</sup>
- e)- Copper 🐴
- Defective metabolism of proteins
- g) Deposition of lipids
- h) Derived lipids \_
- i) Blood in urine
- j) Bilimbin

## Attempt any two

14

- Define and classify Carbohydrates. Write the properties of Carbohydrates.
- b) Give the structure of the following.
  - i) Phenylalanine
  - ii) Tyrosine
  - iii) Cholesterol
  - iv) Glucose

1 . 1984		http://www.rgpvonline.com			
		[2]			
c)	Write note on any one				
	i)	Urea cycle			
	ï)	β-oxidation of fatty acids			
Atte	ttempt any two.				
a)	a) Write two identification tests for the following				
	i)	Proteins			
	ii)	Lipids -			
	iii)	Disaccharides			
b)	Give the deficiency diseases/disorders for the following				
		Vitamin B <sub>1</sub>			
	ii)	Vitamin D .			
	iii)	Vitamin C			
	iv)	Zinc .			
	v)	Copper			
	vi)	Vitamin B <sub>9</sub>			
	vii)	Vitamin E -			
c)	Give	e the biological importance of protein. Discuss essential essential amino acids.	and		
Atte	empt a	any two. http://www.rgpvonline.com	14		
a)	Define and classify enzymes. Discuss the mechanism of action of enzymes.				
b)	Give	Give the pathological significance of lymphocytes.			
c)	Disc	cuss Citric Acid cycle.			
Atte	empt	any two			
a)	Discuss the role of potassium in human bard				

5. A

3.

4.

- a)
- b) Explain -
  - Edema i)
  - Hyponatremia ii)
  - Group specificity ii)
  - Optical specificity iv)

S/2019/1946

	c)	Write note on			
		i) Glycogenesis			
		ii) Glycogenolysis			
6.	Atte	Attempt any two 14			
	a)	Define vitamins and co-enzyme. Write in detail about two	fat		
		soluble or water soluble vitamin.			
	b)	Explain the various factors affecting enzyme action.			
	c)	Explain			
		i) Acid Value			
		ii) Saponification Value			
		iii) Polycythemia			
		iv) Sterility			
7.	Att	empt any two	14.		
	a)	Discuss the abnormal constituents present in urine.			
	b)	Write the role of minerals in the human life processes.	_		
	c)	Give the physiological role of erythrocytes in the body.			
8.	Wr	ite short notes on.	14		
	i)	Water Metabolism			
	ii)	Disorders of lipid Metabolism	-		
	iii)	Essential Amino acids
