[4]

- 7. a) Differentiate among the following:
 - i) Physical address and logical address
 - ii) Paging and segmentation
 - What is distributed system? Discuss the advantages of distributed systems.
- 8. Write short notes on the following (any four):
 - a) Worms and viruses
 - b) Key features of windows file system
 - c) Distributed shared memory
 - d) Parallel operating system
 - e) RPC

CS-502

B.E. V Semester

Examination, December 2016

Operating System

Time: Three Hours

Maximum Marks: 70

- Note: i) Attempt any five questions out of eight questions.
 - ii) All questions carry equal marks.
- a) What is Operating System? Define the essential properties of the following types of operating system:
 -) Batch
 - ii) Time sharing
 - Describe the differences among short term, medium term and long term scheduling.
- a) Discuss various file allocation and access methods. Compare their advantages and disadvantages.
 - Describe how a file directory system can be organized into one-level, two-level and tree-structure directories.

[2]

a) Consider the following set of processes:

| Process | Processing Time |
|---------|-----------------|
| Α | 3 |
| В | 5 |
| C | 2 |
| D | 5 |
| E | 5 |

Develop a Gantt-chart and calculate the average waiting time using :

- i) FCFS
- ii) SJF
- iii) Round Robin (q = 1)
- b) What is Thread? What resources are used when a thread is created? How do they differ from those used when a process is created?
- 4. a) Briefly explain the following:
 - Mutual exclusion
 - ii) Critical section problem
 - b) Write a Semaphore solution for dining philosopher's problem.
- 5. a) What is Deadlock? What are the four necessary condition for a deadlock of occur?

[3]

b) Consider the following snap shot of a system:

| | Allocation | Max | Available | |
|---------|------------|-------|-----------|--|
| | ABC | ABC | ABC | |
| P_0 | 010 | 753 | 3 3 2 | |
| P_1 | 200 | 3 2 2 | | |
| P_2 | 302 | 902 | | |
| P_3 | 2 1 1 | 222 | | |
| P_{A} | 002 | 433 | | |

Answer the following questions using Banker's algorithm:

- i) What is the, content of the matrix need?
- ii) If a request from process P₁ arrives for (1, 0, 2) can the request be granted immediately?
- iii) Is the system in a safe state?
- 6. a) Consider the following page reference string

How many page faults occur for the following replacement algorithm, assuming three frames?

- i) FIFO replacement
- ii) LRU replacement
- iii) Optimal replacement
- b) What is meant by thrashing? Explain various causes of thrashing.
