Explain Markov analysis in detail. How reliability can be calculated from this model.

Write function of a maintenance activity in an industry.

OR

- Define breakdown maintenance.
- Define design-out maintenance. In which industry this type of maintenance can be used.
- Compare predictive and preventive maintenance with examples.

OR

Explain steps to be taken in adoption of emergency maintenance.

- Explain term Condition Based Maintenance (CBM).
  - Write benefits of using CBM. b)
  - What are steps involved in vibration monitoring.
  - Write in detail about wear debris monitoring in mechanical system.

OR

Explain corrosion monitoring in detail..

- Write benefits of Reliability Centered Maintenance (RCM). a)
  - Define Total Productive Maintenance (TPM).
  - Write in short about Failure Modes and Effects Analysis (FMEA).
  - Write applications and benefits of using Failure Modes, Effects and Criticality Analysis (FMECA).

OR

Differentiate qualitative and quantitative approach used in FMECA.

Roll No .....

## AU/ME - 801(C)**B.E. VIII Semester**

Examination, June 2016

## Reliability and Maintenance (Elective - III)

Time: Three Hours

Maximum Marks: 70

[Total No. of Printed Pages :2

Note: i) Answer five questions. In each question part A, B, C is compulsory and D part has internal choice.

- ii) All parts of each question are to be attempted at one place.
- iii) All questions carry equal marks, out of which part A and B (Max. 50 words) carry 2 marks, part C (Max. 100 words) carry 3 marks, part D (Max. 400 words) carry 7 marks.
- iv) Except numericals, Derivation, Design and Drawing etc.
- Give definition of reliability.
  - Explain important factors involved in giving reliability of a component.
  - c) What is Weibull distribution used in probability calculation?
  - Explain normal distribution. How reliability can be computed with distribution.

OR

Derive an equation showing relation between reliability and MTTF.

- Define maintainability of a mechanical system.
  - Define redundancy system.
  - Derive equation for calculation of reliability of a series system.
